What is a VPS?

A VPS is created by partitioning a dedicated server into multiple Virtual servers such that each **PARTITIONED SERVER** can run its own full-fledged operating system and can be independently rebooted. Each **PARTITIONED SERVER** is called a VPS.

You have full control of your VPS and get dedicated resources such as RAM, Disk Space, Bandwidth, and CPU for that VPS. Just like you, other users get a VPS on the same dedicated server; however they do not interfere with one another and work in complete isolation.

The latest cPanel/WHM control panel is included **FREE** with every VPS. **cPanel/WHM** allows you to configure multiple domains, set up email accounts, create databases, park domains and much more!

Why choose a VPS instead of Shared Hosting?

More and more businesses are now moving to VPS HOSTING for more reasons than just speed and flexibility.

Shared hosting is relatively insecure and emails and databases remain at risk when hosted under a shared hosting environment. The VPS nearly eliminates this risk by ensuring that no other domains/websites/applications are hosted within the clients VPS.

A VPS is scalable with zero downtime. You can choose a minimal allocation VPS to run a simple e-mail server or a high-end VPS to run a webserver with enough resources to support extensive database applications and heavy traffic.

All VPS Packages Include

Management of all aspects of the VPS including CentOS Operating System and Premium Control Panel - cPanel/WHM, DNS Management, Nameservers and MX records, Setup of SPF / DKIM / DMARC records to mitigate Spoofing Attacks, Private Nameservers, Private Hostname - host.yourdomain.com, Webmail for remote access, Roundcube Webmail Client, Private Dedicated I.Ps, FTP, MySQL, EXIM Mail Transport Agent & CSF Firewall.

- ✔ Physical hardware management, monitoring and replacement.
- ✔ Network availability.
- ✔ Free initial security hardening.
- ✔ Free installation of the cPanel control panel is done during VPS provisioning.
- ✔ Free initial accounts migration from remote system with the same control panel.
- ✔ Free control panel and OS optimization is done during provisioning.

Virtual Private (VPS) Email & Hosting Features

Operating system

Unlimited Domains on VPS

Full root access

MTA - Exim (cPanel)

Apache, PHP, MySQL

2 Dedicated IPAddresses

SSD Drives

Private nameservers

WorldClass VPS Network

Private Hostname - host.yourdomainname.com

We setup your host name as host.yourdomainname.com and configure reverse pointers for the server I.P. to exclusively match your hostname. This ensures that your genuine emails are NEVER Blacklisted or Blocked by RBL lists.

cPanel / WHM License Included (Up to 5 Accounts)

The cPanel & WHM software package is an easy-to-use graphical control panel that gives website owners the ability to quickly and easily manage their emails and websites.

Fast and quality support around the clock

Need any assistance, any time of the day & you can expect us to be there for you.

Auto SSL - Free DV SSL Certificates

Auto SSL is a WHM/cPanel solution activated by default in your hosting account as it automatically installs and renews cPanel/Sectigo certificates for each domain in cPanel.

VPS Hosting Plans & Specifications				
PLANS	SSD PLATINUM	SSD TITANIUM	SSD PREMIUM	SSD INFINITIUM

Managed Support	Yes	Yes	Yes	Yes
Monthly Price	₹17,700	₹25,900	₹36,900	₹43,200
Annual Price	₹2,12,400	₹3,10,800	₹4,42,800	₹5,18,400

You can start with a small VPS and scale your VPS as needed with no IP change or data migration required during the upgrade.

VPS Hosting Plans with unlimited email accounts & Cpanel - A professional and customizable solution for managing your email communications.

With Our Flexible VPS plans, you have the flexibility of creating an unlimited number of email accounts associated with each of your domain hosted on the VPS and convenience to access your emails across multiple devices.

Your email accounts are accessible through webmail interface (www.yourdomain.com/webmail), or your email client application (Thunderbird or Microsoft Outlook etc...), so you can effortlessly set up, configure, and customize your email accounts via a single interface.

We provide you with an array of advanced email tools via cPanel control panel. From unlimited email aliases, mail forwards, spam protection, SSL/TLS and more, you have all the tools at your disposal to take full control of your email communication.

Each incoming & outgoing eMail activity is logged. This is extremely useful to check email delivery i.e, if users raise queries about mails not being received or sent.

We fully manage your email applications on the VPS, so you do not have to encounter any technical challenges.

Advantages Of Hosting With Unlimited Email Accounts on your OWN Private VPS

- ✔ Privacy- Hosting your email on your VPS gives you a controllable degree of privacy. At the very least, you'll know that any communications that pass through your VPS email server aren't getting inspected by third parties.
- ✔ Cost Effective- You do not have to pay a fee for every additional eMail account that you create. It's Free. You can create hundreds of eMail accounts across Multiple Domains and not pay anything at all in addition to the VPS Hosting Fees. That's a massive potential cost saving. It might even offset the cost of hiring IT talent to manage your email hosting for you on a sufficient scale.
- ✔ Scalability- Accommodate business growth by creating new email addresses for team members, departments, or projects without limitations.
- ✔ Segmentation- Easily segment emails by creating separate addresses for marketing, accounts, sales, support, etc...
- ✔ eMail Logs- Check email delivery i.e. if users raise queries about mails not being received or sent; as each incoming & outgoing eMail activity is logged.
- ✔ Customization- Customize each email account with filters, autoresponders, and forwarding rules for efficient management and increased productivity.

Mumbai Hosting Clients: Case Studies

A Multinational Company uses Mumbai Hosting's VPS for providing email accounts and webmail access to all its employees.
